# FAX REFERRAL FORM

## Referring Physician

Name: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

### Dear Doctor/Medical office:

We are referring our patient to you for administration of Monoferric® (ferric derisomaltose) as follows:

Patient weight (kg): \_\_\_\_\_ MONOFERRIC is an iron replacement product indicated for the treatment of iron deficiency anemia in adult patients:

- who have intolerance to oral iron or have had unsatisfactory response to oral iron
- who have non-hemodialysis dependent chronic kidney disease

Dosing:  1,000 mg (patient weighs 50kg or more)  20mg/kg actual body weight (patient weighs less than 50kg)

**PLEASE NOTE: Included is a copy of the patient's insurance information and current lab values with this fax.**

### STEP 1

### Patient Information

First Name: \_\_\_\_\_ Last Name: \_\_\_\_\_ Date of Birth (MM/DD/YYYY): \_\_\_\_ / \_\_\_\_ / \_\_\_\_

Street Address: \_\_\_\_\_ City: \_\_\_\_\_ State: \_\_\_\_\_ Zip Code: \_\_\_\_\_

Phone: (\_\_\_\_) \_\_\_\_ - \_\_\_\_  Cell  Home

Primary Insurance Name: \_\_\_\_\_ Insurance Phone: (\_\_\_\_) \_\_\_\_ - \_\_\_\_

Secondary Insurance Name: \_\_\_\_\_ Insurance Phone: (\_\_\_\_) \_\_\_\_ - \_\_\_\_

### STEP 2

### Diagnosis Coding

Monoferric has a product-specific J code: **J1437** | National Drug Code (NDC): **73594-9310-1**

ICD-10-CM Code: \_\_\_\_\_ | Secondary ICD-10-CM Code for underlying condition: \_\_\_\_\_

Please note: Appropriate primary ICD-10-CM code for IDA as well as a secondary ICD-10-CM code for underlying condition causing IDA should be provided to support an on-label diagnosis for Monoferric.

### SIGN & DATE

Healthcare Professional Signature\*†: \_\_\_\_\_ Date: \_\_\_\_ / \_\_\_\_ / \_\_\_\_

\* Examples include Prescriber, Nurse, Pharmacist, Physician Assistant, Reimbursement Counselor, Account Manager, and Authorized Office Personnel.

† The referring center is recommending Monoferric based on the patient work up, and it is recommended that the treating physician confirm Monoferric is the appropriate therapy prior to treating this patient.

### To be completed by the infusion center:

**Infusion confirmation:** Please fax back confirmation of their infusion(s).

Patient Name: \_\_\_\_\_ Date of Infusion (MM/DD/YYYY): \_\_\_\_ / \_\_\_\_ / \_\_\_\_

### INDICATION

Monoferric is indicated for the treatment of iron deficiency anemia (IDA) in adult patients:

- who have intolerance to oral iron or have had unsatisfactory response to oral iron
- who have non-hemodialysis dependent chronic kidney disease (NDD-CKD)

### IMPORTANT SAFETY INFORMATION

#### CONTRAINDICATIONS

Monoferric is contraindicated in patients with a history of serious hypersensitivity to Monoferric or any of its components. Reactions have included shock, clinically significant hypotension, loss of consciousness, and/or collapse.

**Please see additional Important Safety Information on page 2.**

**Please see full Prescribing Information [here](#).**

## INDICATION

Monoferric is indicated for the treatment of iron deficiency anemia (IDA) in adult patients:

- who have intolerance to oral iron or have had unsatisfactory response to oral iron
- who have non-hemodialysis dependent chronic kidney disease (NDD-CKD)

## IMPORTANT SAFETY INFORMATION

### CONTRAINDICATIONS

Monoferric is contraindicated in patients with a history of serious hypersensitivity to Monoferric or any of its components. Reactions have included shock, clinically significant hypotension, loss of consciousness, and/or collapse.

### WARNINGS AND PRECAUTIONS

#### Hypersensitivity Reactions

Serious hypersensitivity reactions, including anaphylactic-type reactions, some of which have been life-threatening and fatal, have been reported in patients receiving Monoferric. Patients may present with shock, clinically significant hypotension, loss of consciousness, and/or collapse. Monitor patients for signs and symptoms of hypersensitivity during and after Monoferric administration for at least 30 minutes and until clinically stable following completion of the infusion. Only administer Monoferric when personnel and therapies are immediately available for the treatment of serious hypersensitivity reactions. Monoferric is contraindicated in patients with prior serious hypersensitivity reactions to Monoferric or any of its components. In clinical trials in patients with IDA and CKD, serious or severe hypersensitivity were reported in 0.3% (6/2008) of the Monoferric treated subjects. These included 3 events of hypersensitivity in 3 patients; 2 events of infusion-related reactions in 2 patients and 1 event of asthma in one patient.

#### Iron Overload

Excessive therapy with parenteral iron can lead to excess iron storage and possibly iatrogenic hemosiderosis or hemochromatosis. Monitor the hematologic response (hemoglobin and hematocrit) and iron parameters (serum ferritin and transferrin saturation) during parenteral iron therapy. Do not administer Monoferric to patients with iron overload.

### ADVERSE REACTIONS

Adverse reactions were reported in 8.6% (172/2008) of patients treated with Monoferric. Adverse reactions related to treatment and reported by  $\geq 1\%$  of the treated patients were nausea (1.2%) and rash (1%). Adjudicated serious or severe hypersensitivity reactions were reported in 6/2008 (0.3%) patients in the Monoferric group. Hypophosphatemia (serum phosphate  $< 2.0$  mg/dL) was reported in 3.5% of Monoferric-treated patients in Trials 1 & 2.

To report adverse events, please contact Pharmacosmos at 1-888-828-0655. You may also contact the FDA at [www.fda.gov/medwatch](http://www.fda.gov/medwatch) or call 1-800-FDA-1088.
